LARDI & PARTNER
CONSULTING GMBH · STRATEGY & BUSINESS ADVISORY

ACCELERATE DIGITAL & BUSINESS TRANSFORMATION

Tap into the power of digital

30-day Digital Transformation Strategy Approach

Turning digital vision into implementable actions

True digital transformation involves organization wide change in order to achieve sustainable value in the digital economy. We provide seamless end-to-end support to help your company accelerate digital business transformation journey and quickly realize financial upsides.

Our Digital Business Transformation Approach offers an end-to-end framework that helps organizations navigate the impacts of disruption. The rapid development process takes you from the point of understanding disruptors and the business ecosystem, through to identifying, developing and prioritizing the right transformation initiatives.

The framework utilizes tools, methodologies and deep expertise to accelerate completion of Situational Analysis, Disruptive Visioning and Strategic Roadmap. We will help your company incorporate the best people, processes and technologies that deliver sustainable results in the good times and bad.

Lardi & Partner Digital & Business Transformation Framework

Our four-step approach offers a pragmatic digital business transformation:

Situational Analysis	Global market trends scan, internal & external business ecosystem analysis, and business digital readiness review.
Disruptive Visioning	Strategic direction & vision, and digital solutions across customer experience, products & services, operations, and business model.
Strategic Roadmap	Business transformation initiatives, prioritized implementation roadmap, and related business cases, incl. target operating model development.
Build & Implement	Implementation of technology solutions, including build, pilot initiatives and success measures.
